The authors regret we modified the title as “The impact of total neoadjuvant treatment on nonoperative management in patients with locally advanced rectal cancer: The evaluation of 66 cases”. Thus, the phrase “in a single-center” was deleted from the title. Although it was the surgeons and nuclear medicine specialists from Bogazici Medical Sciences Academy who mainly treated all patients in this study, radiologists, radiation oncologists, and medical oncologists from different treatment centers participated in the research as well. Therefore, as the readers may misunderstand “single center” in the title of the manuscript, we deleted it by also taking the opinion of other authors as well as the corresponding author into account.

Moreover, since Institutional IRB objected to the first version of the sentence, published as an article in the press, we replaced “Organ preservation was offered to patients with approval from the local Institutional-Review-Board (2019-02/4)”, with ‘In the study, retrospective analysis of the patients was made by approval from the local Institutional-Review-Board (2019-02/4).’ We did so by taking the approval of the authors and corresponding authors.

In the online article, we corrected the authors' addresses as Acibadem University Maslak Hospital instead of Acibadem University, since Acibadem university has many affiliated hospitals. And also, correction made for the name of Bogazici Academy for Clinical Sciences that addressed as Bogazici clinical Sciences Academy at the online version. Furthermore, we corrected the name of one of the co-author's name as Aslihan Guven Mert instead of Aslihan Guven.

In Table 3, captions typo mistake that explanation of the PET abbreviations was lowercase is corrected by the capitalization of each word. As the authors, we would like to present our apologies for any inconvenience.
